

**Project Design Phase
Proposed Solution Template**

Date	5 July 2026
Team ID	
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Managers cannot process 50k+ raw records to map changing demographic trends, leading to inventory waste and inefficient delivery.
2.	Idea / Solution description	A 3-tier Flask portal with an embedded Tableau visualization grid that converts transactional logs into interactive, multi-zone insights.
3.	Novelty / Uniqueness	Uses compressed analytical data extracts for instant performance and includes an integrated narrative storytelling engine for executive strategy.
4.	Social Impact / Customer Satisfaction	Reduces neighborhood food waste by aligning kitchen supply with local demand while improving overall delivery speed.
5.	Business Model (Revenue Model)	B2B SaaS subscription model with tiered access for individual restaurants and large-scale, multi-region enterprise food chains.
6.	Scalability of the Solution	Modular design separates lightweight web routing from heavy analytics nodes, allowing for rapid expansion across thousands of regional logs.
